

2JDB0203-C831G

2G/3G Cellular Development Board

Key Features

Development Board for Connector Mount Antennas 2G/3G Cellular Antennas: 2G, CDMA, GPRS, 3G, WCDMA, HSPA, etc. Antenna Mating Connector: Edge SMA-Female Board Connector: Flange SMA-Female Ground Plane of 95x40 mm

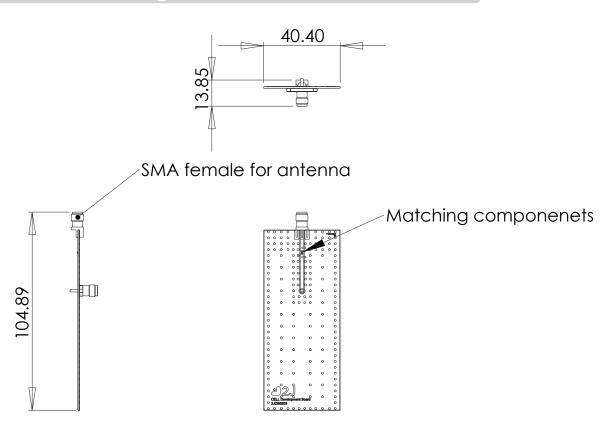

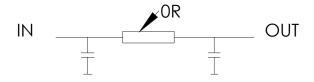

1. Board drawings

This development board is suitable for finding best matching componnets for CELL antennas and test CELL antenna as ground size is similar to most of the existing devices on market.

For matching components can be used up to 3 components in Phi network. But in default is used just 0R resistor for connecting input port with output port.
